

When there is a new technological device ~~is~~-available, some people will buy it immediately while others will wait until many others have adopted it. Which view do you agree more?

No one can ever deny the significant role of technology on people's life. It is obvious that, each technological device has some advantages and disadvantages. Personally, I believe that by not buying it immediately not only will it be more practical for people but also it ~~has~~will have some benefits and some reasons persuade me to put forward this view which I will explain with a couple of examples.

To begin with, there is no doubt that each technological device has some negative bugs which will be improved after a while, so it will be more beneficial for users, if they wait for ~~rectify~~rectification of the bugs and then purchase it because in that condition they ~~did~~will not ~~have~~ waste their time for ~~exte~~upgrading their apparatuses. My personal experience is a compelling illustration of this. My brother and I bought the iPhone 4 months apart. I had an ~~an~~6 iPhone 6 and my brother had a 6s. I struggled with diverse issues such as keeping charge or connecting to the Wi-Fi but he did not, just because iPhone designers realized the previous series bugs and launched a new modified series.

Another considerable point is ~~a~~the price. When Novel products ~~when~~ are newly introduced, they are more expensive than they must be. Hence, it is more economical to wait a while/short period of time ~~in order~~ ~~to~~so that the costs will be reduced which is conducive to saving more money for individuals ~~to~~for the same device. For instance, IBM Simon was ~~a~~the first touch iPhone in thea whole world which was extremely expensive ~~on~~at that time but after a while other companies such as Nokia, Samsung succeeded in producing the phone touch screen ~~which~~ ~~had~~at a more reasonable price.

To cut a long story short, although some people are eager to get new devices as soon as possible, I strongly believe the disadvantages of this approach/attitude/decision/occurrence greatly outweigh the benefits- (Owning to fact that)/because/since the bugs are not discovered yet and besides the price is not logical.
