

**Some people say that the Internet provides people with a lot of valuable information. Others think access to so much information creates problems. Which view do you agree with?**

~~New a day~~ nowadays, in ~~thea~~ modern world, the importance of information technology ~~has increases~~ ~~increased~~, and creating the platform to access up-to-date data is the main goal of the information companies. ~~The~~ Internet is the chief way providing state-of-the-art materials. However, it is an old conflict whether the internet prepares efficient information. Although some believe that via ~~the~~ internet we ~~encounter are exposed to countless unlimited~~ information, which can be considered the negative aspect, I deem the strengths of the internet outweigh its weaknesses. I will outline my opinion and point out the most vital reasons in the following paragraphs.

First of all, in this day and age, the speed of human knowledge in various fields such as medicine ~~has~~ ~~increases-increaseed~~ **without cease**. The information and statistics are changing moment by moment and if your information sources are based on physical books, that makes you ~~to~~ purchase the new ones in order to accede to new information, which is costly. However, thanks to the internet, you get up-to-the-minute information effortlessly. For instance, when I was working on my master project two years ago, which lasted about a year, instead of getting information through physical books in the library which were too limited, I could easily search and gather the new information from online libraries and revise my thesis. Via ~~the~~ internet, we access ~~the~~ information beyond the border and that is the uniqueness of the internet.

Furthermore, the internet is a profitable instrument for students to solve their educational problems. There are numerous videos ~~in-on~~ some websites such as YouTube explaining the educational materials in each grade. However, in the past, we had to get a private tutor and expend a lot of money ~~to~~ ~~overcome-overcoming~~ the educational questions. You can even start to learn ~~a~~ new software or a new language step by step via innumerable, handy videos or applications ~~in-on the~~ internet. Many language applications such as Duolingo are so practical to this means and you can also find ~~the~~ new ~~learnersones~~, who are learning the same language and share your experiences or get help from each other. It is possible thanks to the internet to communicate with so many native speakers in order to improve your speaking skill.

In addition, the internet has ~~broken-bring~~ down the borders of countries and has made it easier for people to communicate ~~to-with~~ each other in spite of physical distances. Although the various materials of social media can deflect us from our goal, which we are searching for, they make it possible to connect ~~to~~ others, to make new relationships and to be in touch with your families or friends who live in other countries.

To sum up, all devices or instruments have some disadvantages and the internet is not an exemption. However, it is our art to minimize ~~itsthe~~ shortcoming-of.
