

In this century we use so much plastic for carrying our stuff and packaging our food. because of that the amount of production of rubbish increases. We should find the way to lessen this trend ~~prodoto~~ save our planet.

This case depends on family to find the talent of their children And train them. Of course some ~~childs-~~ children are born ~~born~~ with some special talent. But I think every child ~~ren have~~ has some talent and we should try to find it ~~this talents~~.

In past few years scientists have comr to understand that our physical and mental health h influence by our genes . but I think our own experience and environment is ~~exert an~~ influence e too

The children that are under seven years old ~~they~~ should play and have fun with other children but I think they should go to kindergarten to communicate with other children. If we send our ~~childs-~~ children to school soon they aren't going to have a good/happy childhood.

In our generation education is an important thing but it is so important that our children have free time and enjoy their life. if we force them, ~~sm~~ they get tired off ~~from~~ school and university
