**Using a computer everyday day can have more negative than positive effects on young children.**
**Do you agree or disagree?**
**Give reasons for your answers and include any relevant examples from your knowledge or experience.**

During the last few decades, computers have become one of the major parts of everyone's life and nowadays, there are sheer numbers of tasks which are facilitated by computers. Therefore, children are not exempted from this fact. The question, however, is whether there should be any limitation on using a computer/computer use for children.

First, it is clear that computers have brought about certain benefits in terms of education. Now children, for example, can have rewarding access to a wide variety of unlimited educational information by using a computer. Also, they could easily find the answers to their questions by a simple search on google. Moreover, now there is a wide range of educational softwares which do not only expedite the learning procedure but also make it more attractive for youth. It is notable that, attending the online class which has become very popular these days is only possible by using computers which are connected to the network.

However, although using a computer has many advantages for young children, there are some disadvantages to this trend which should be considered. Despite its use using a computer for training and learning purposes, it the computer could be used as an entertaining and gaming device, and often these games are extremely addictive for the children. additionally, there is a possibility of getting through to the inappropriate website which could have a devastating effect on the children.

In conclusion, although daily usage of the computer for young children is one of the controversial issues in modern society, it could not consider an option for children. in this manner, schools have to provide training courses to teach them how to use computers for a productive approach, and parents need to keep an eye on their children and monitor their computer activity to prevent misuses.
