

Some people think that it is good for a country's culture to import foreign movies and TV program. Others think that it is better to produce these locally. Discuss both views and give your opinion.

There are different opinion about foreign movies and TV programs, some people, included me, think that this programs are useful for people and manners, where other argue that those have negative effects on people and their manners.

On the one hand, foreign programs have their own cultures which are different from behaviors and values of other societies which have negative effects on individuals' attitudes and manners. For instances, Turkish serials which are very popular in my country, advertise Turkish clothes, food and cultures which are very different from that ~~are~~ common in my country and lead to changing some of the Iranian manners. Nevertheless, governments can increase other cultural programs such as festivals and ceremonies to ~~increase-raise~~ public awareness and motivate people to save their own cultures and manners.

On the other hand, amazing and enjoyable ~~time-moments~~ are inevitable parts of life and all cultures insist that people need to enjoy their leisure times which have profoundly positive effects on their manners and attitudes. The programs which have high quality in production are interesting for people and creates amazing time for them because they are produced with professional teams which have best actors and actress, modern technology as well as beautiful and amazing stories. For example the "game of thrones" is the name of an American serial which mesmerizes people in all around the world and people have unforgettable leisure time with it. Furthermore, Domestic actors, directors and producers have the chance to watch overseas programs easily and learn how to make ~~an~~ interesting movies.

In conclusion, I believe that although foreign movies have their negative cultural effects, people need to have funny and enjoyable time and foreign movies can create hilarious times for them and we cannot deprive people of watching them.
