

Some think scientists should be allowed to ~~be send~~ sent into space to communicate with other life forms while others believe this is too dangerous. Discuss both sides s and give your own opinion.

The subject that aliens have benefits or they have some disadvantages to humans not specified. It is going to be discussed in the following paragraphs.

Some people believe that alien life ~~have~~ has items to learn. ~~Spatially~~ Specially it can help to improve long life because they may have high technology that access to ~~them~~ it for humans s will take thousands of years. an Other reason is they have ways of dealing with humans dangerous ~~threats~~ damages of human become

~~starting them~~ such as nuclear war, global risks threat of global.

On the other hands, we don't know how ~~are~~ aliens' shape? How is ~~there~~ their life and what ~~are~~ is their ~~mail~~ meals? They may have 2 green heads with 7 hands. We don't know how we can communicate with them. They dictates the ~~patterns~~ meme that ~~it~~ could pose a serious problem to the human race. It takes time ~~for~~ to humans to find a solution. ~~may~~ humans may have to ~~f~~ light the aliens. This issue cause technological al and natural life ~~human~~ to stop. But I believe that we can ~~search~~ for them ~~into~~ space and ~~allowed~~ ourselves to that find them. I think if they have excilent ~~technological~~ technologies ~~which~~ it will help our life ~~and~~ so it is worth.
