

**In some areas of the US, a 'curfew' is imposed, in which teenagers are not allowed to be out of doors after a particular time at night unless they are accompanied by an adult.**

**What is your opinion about this?**

---

Recently, The US government legislated a restriction rule which is called 'curfew' in order to keep children indoors after a certain time at night. This restriction is mostly applied in the regions which are suffering from a great deal of violence and criminal activities. This essay deals with both pros and cons of this restriction.

According to the reports which are released by the local police, the rate of violence has increased considerably in some areas of the US and approximately 70 % of these criminal activities took place at ~~the~~ midnight. consequently, there are many people who are in ~~the~~ favor of this restriction, and they even argue that this limitation should be running ~~through~~ all over the US. It is completely evident that the children under 15 and 16 are more in danger and it would be really horrendous for them if they want to protect and keep themselves safe after midnight in some regions. However, the aim of this restriction is not only to protect the child from robbery and criminal affairs but also, is to prevent them to get involved in criminal activities accidentally. To the best of my knowledge, young children are really curious and mostly like to experience new things. Therefore, keeping them ~~far~~ away from these dangers is vitally important.

On the other hand, there are some people who are against this attitude and believed that children should be encountered with all the available hazardous and adversity of the a real society from an early age in order to become a well informed~~informative~~ person and overcome the hard situations s in the future.

In conclusion, it seems that this kind of restriction is crucially important in some parts of the US and it would be better to at least keep the children under the age of 15 inside a home after 9 or 10 in-theat night. Additionally, this rule would help the children to spend their time studying rather than junk-useless activities and also regulating their sleeping time.
