

Many offenders commit more crimes after serving the first punishment. Why is this happening, and what measures can be taken to tackle this problem?

These days the number of people committing crimes has been increasing, particularly those who had been in jail. Many reasons can be considered why they tend to carry out ~~it~~them, but it is more important to know how to address such problems.

There are several main reasons why offenders commit more serious or violent crimes. Foremost, recent surveys have been carried out to determine that thousands of re-offenders who were young with no criminal background but they were charged to prison where considerable dangerous criminals live there minor offenses; as a result, new ones acquire a broad range of criminal activities that means they have adequate time to exchange their information about the methods have already been used. Furthermore, they are in an environment that requires-pushes them to be able to protect themselves in order to survive; consequently, they become more violent and dangerous. Secondarily, a growing number of offenders come from poor background families where they are mostly uneducated and unskilled children; hence, they tend to commit crimes to live.

To solve this phenomenon the criminal justice system should focus on rehabilitation rather than punishment. A straightforward solution would be to separate inexperienced offenders from those having several committingpriors. This trend might avoid-prevent the various methods they carry out crimes. In addition, governments could provide a proper situation in which criminals obtain suitable acquisitions of skills in order to find an occupation. Moreover, the executive-officials/authority figures can encourage offenders to read books and take notes to reduce the amount of punishment since reading is regarded as a way in which we can shift attitude. In conclusion, it is undeniable that re-offenders are one of the semost severe verest problems that many countries face. However, there are various measures that can be taken to mitigate this issue.
