

Subject: using a computer every day can have more negative than positive effects on your children. Agree or disagree?

Ever since the computer and the internet became an inseparable part of the human lives, The struggle of children overusing the computer ~~has become~~became an issue.

The disadvantages of children using electronical devices such as laptops, tablets, ~~and iPads and etc~~ have two sides; One is impairing children's physical health by damaging their eye sight and ~~physical~~ posture as the second side is the content which children are being exposed to.

In my belief the second one is more important as most of the personality is developed through childhood. Thus having less interaction with actual people while spending much more time on all ~~those that~~ violent content that the internet offers, can lead to irreparable damage to children's personalities.

Looking into the brighter sides of internet usage, We find out that so many skills and beneficial information are learned via the internet. I believe that the solution for this issue is to control and limit the time of children utilizing electronical devices.
