

Creative artists should be given freedom to express their ideas through words, pictures, music and films. Some people nevertheless think that the government should restrict artists' freedom of expression. Discuss both views and give your own opinion.

Undoubtedly, works of art have always been one of the most significant aspects of our culture. In this regard, some individuals think that those active in art fields/artists should be given the liberty to convey their notions through their works of art. Some others s argue that artist's-artists' freedom should be limited by the administration. I agree with the viewpoint that artists should be free in order to express their opinions because artists-they can reflect social issues.

On the one hand, artists should be free to express their emotions through works of art. This because numerous artists convey their opinions and important things /matters such as social problems through paintings, songs or movies. In other words, people become aware of the social issues of their community. For example, in most countries rap singers in their songs represent violence against children. So in this way people /parents are aware and prevent-protect their children from violence. Therefore, it is very essential that artists have the freedom to express their ideas because they give people awareness of social problems.

On the other hand, artists should not be allowed to convey their notion as some of them may disrespect other's-others' beliefs. It means that it can cause offence for different age groups, different religious beliefs and different attitudes. For instance, a salient example of that can be Amir Maghsoudloo ,an Iranian rap singer. His songs has-have influenced on-young individual's-individuals' behavior and have ledlead to insults tooffence-on their parents. Thus, the government should limit artist's-artists' liberty because it can cause problems and disrespect for people.

To conclude, after analyzing what has been elaborated above, I agree with the perspective that creative artists should have freedom because I believe that artists assist people and give them useful information through their works of art such as pictures, music or movies also the government should take action in order to pass a new law for artists in this way the government prevent society from problems and disrespect.

Censorship

Artists express attitudes

Judging is hard
