

In the modern world there is a movement away from written exams to more practical assessment. Discuss the advantages and disadvantages of this trend.

Since the schools and educational systems have improved, different kinds of methods which used to evaluate students ~~would~~ have been ~~suggested~~ ~~suggesting~~. The first and the most common one is written exams.

Some believe that although, written exams ~~are~~ might not be the best way of assessing students, they would be the simplest way with ~~the~~ lowest expense. Two important factors, ~~cost~~ and ~~simplicity~~, would be the case that ~~it~~ has been chosen as the most popular examination everywhere. On the other hand, in ~~a~~ wide variety of students' opinion including myself, written exams have the ~~lowest~~ ~~lower~~ stress among other sorts of exams such as practical or oral examinations.

In stark contrast, nowadays some educational authorities argue that while, written exams might be ~~an~~ ~~the~~ effortless and completely unchallenging way of evaluating, ~~;~~ there might be more accurate and effective methods with fewer **defects**. If students ~~are~~ ~~would be~~ evaluated by continuously practical exams not only their theoretical knowledge, but also their practical abilities ~~will~~ ~~would~~ be improved. Therefore, they are likely to pass every stage with more experience and abilities. Besides, by adding practical examination in evaluating systems, students could get used to it and might control their sense of stress and nervousness after ~~a~~ period of time that would be helpful for their future in their social life. Consequently, if imposing cost and time that are necessary for implem~~ent~~ation of recent methods would be ignored; practical exams are ~~the most~~ ~~more~~ (~~a more productive~~) productive way for making progress in ~~a~~ student's life.

To sum up, ~~of all the~~ ~~among lots of~~ methods that have been performed for evaluating students, ~~a~~ written exam is the most undemanding method~~s~~. Despite its simplicity, that might ~~be~~ considered ~~ed as an~~ advantage of this method, it is not the most productive and effective way, as a result, It is worth expending on educational facilities for enhancing ~~the~~ educational system effectiveness. To me, it would be probably ~~a~~ more efficient way to have different kinds of methods along with each other to evaluate students more ~~precisely~~ ~~preciously~~ with moderate cost.
