

Nowadays technology is increasingly being used to monitor what people are saying and doing (for example, through cell-phone tracking and security cameras) .in many cases , the people being monitored unaware that this is happening.

Do you think the advantages of this development outweigh the disadvantage?

Over the past few years, the technological enhancement has been improved in every aspect. Security cameras and cell-phone tracking are ~~two one~~ of these achievements. Like most things , there ~~are is~~ both a good and a bad side. Now I would like to discuss it in more depth.

Nowadays, it has ~~been~~ become ~~moremuch~~ easier for the police and the government ~~to~~ dominate ~~on~~ society in order to prevent crime through these security instruments~~s~~ and if any crime is carried out, there ~~will would~~ be more ~~evidence enhance~~ for investigation. These facilities act as a deterrent to the criminal. If a criminal decides to commit a crime , ~~there it will would~~ be more complex issues for him.

On the other hand , the right of ~~the~~ individual will be endangered by constantly recording people'~~s~~ activities and movement. People would have less privacy in their lives ~~which that it~~ doesn't sound pleasant to them.

~~Although-however,~~ people could ~~further protect provide~~ their privacy ~~more~~ by considering some issues. For instance, there ~~is are~~ a wide range of social networks such as Facebook and Instagram whose servers could access all our data that are uploaded and could use them for their financial gain. Therefore users of such social networks must beware not disclose too much data.

From my point of view, despite all ~~the~~ drawbacks, the pros outweigh the cons. These security facilities have provided~~d~~ more safety and comfort for societies and have decreased many crimes. Also, people are responsible about their privacy by being more careful in use of social networks, ~~although however,~~ they ~~cannot couldn't~~ control other aspects.
