

**Some people prefer to live in a small town. Others prefer to live in a big city.
Which place would you prefer to live in?**

When it comes to if a big city is more pleasant to live or a small town, I would prefer to choose a big city for three main reasons; a better life style, working professionally and continuing my education. I don't hesitate that I can live as nicely as I like through living in a big city.

Big cities always have more facilities, entertainment and enjoyable programs. By living in a big city, I have no preoccupation about health problems since the best doctors and hospitals are in big cities. So not only is there is no difficulty in accessing to health cares and clinics, but also there are the best doctors that specialize in detecting any special disease that small cities probably have big shortage in these facilities. Furthermore, I believe that the bigger cities, the more entertainment programs. So there is no plea for getting bored because I can amuse myself by going to the cinema, theater and wherever I need some variety in my routine life.

One of the most important aspects of our lives is working and earning money. So in that choosing the place for living depends on where we can adapt our profession to. Personally my occupation, which is interior architecture, relies on construction that almost occurs only in big cities where big demands for designing and decorating emerge; indeed, affording the life expenses has made people to choose their location.

Nowadays developing our knowledge and education is not something that can be halted; in actuality, in the information age, we are observing that the speed of adapting data is becoming more and more; moreover, accessing to information has a striking role in our education; consequently, connecting to high speed internet, access to equipped libraries and communication with certain specialists in different majors that are required to improve our knowledge, are connected to the place of our residence; and, in fact, these facilities are more achievable in big cities.

Therefore, to me living with a better quality, doing my favorable job and getting updated knowledge are as essential as can define my location for living to live. Depending on my definition of a pleasant life in big cities causes me to opt one of them as my settlement.
