

Improvement in health, education and trade are essential for the development of poorer nations , however ,the government of richer nations should take more responsibility for helping the poorer nations in such areas.

Do you agree or disagree?

Nowadays, authority figures argue that we are all humans, and powerful and developed countries must support poorer ones to reach the united world union-universe.

Some advocates state that ~~in~~ according to human rights, all humans are equal to each other and we must not put any discrimination between them. All ~~of~~ people have the right franchise to use facilities ,it is not fair that just some special individuals use facilities .if I had infinite power ~~of world in my hand~~ ,I would share all of the amenities premium in the world.

In my opinion, our first priority must be finding ~~rethe~~ source of poverty and try to recover serious problems. Powerful and wealthy states must negotiate with each other and make a decision to send help for them in best way.

Secondly, the governments of richer nations have a lot of trained stuff like teachers and tutors and skillful doctors and original medicine and a lot of welfare and equipment to assist poorer nations ~~in to~~ change their life and destinations. Poorer countries are in danger of dangerous disease because of lack of food and nutrition and good ingredients in their meals. Today, we see lots of diseases that ~~break out breakdown~~ because of lack of suitable remedy, hence with sharing facilities we can reclaim life of lots of people.

Thirdly, they could organize some places to educate them to promote the whole country to promote widespread literacy in every place for now and next generation. literacy has a lot of bad consequences and it causes lot of danger and increases cultural poverty.

On the other hand, poverty can cause a lot of crime. We were not born criminals, but some situations make individuals ~~to~~ do commit felony, most teenagers have

high expectation from life ,many fathers become thieves thief to cover the  
protect expenses of the family.

To some-sum up ,for having a healthy world both in mentally and physically it is  
better to advise advice rich countries to help the impoverished them for nurturing  
our next generation in welfare and show the union that we are one and remove  
class distinction.
