

**Popular events like the football World Cup and other international sporting occasions are essential in easing international tension and releasing patriotic emotions in a safe way.**

**To what extent do you agree or disagree with this opinion?**

Over the past decades the modern world has witnessed significant changes in international events around the world. Some people welcome the idea that sporting occasions are essential in easing international tensions and patriotic emotions in a safer way. In this essay I will look at both sides of the argument and give my own opinion.

First of all, the World Cup, Olympics and other international games work for easing tension among different nations. For instance, in Olympic event south Korean and North Korean could better know each other together and good relationship. These countries could ease easing there some tension after Olympic event in London. Some family in this event met each other together and spent a lot of time together and they could releasing their emotions in a safe place. Therefore, after this event could continue their life without tension. In addition, politicians in the World Cup or other international events such as Olympic review inspecting relationship between countries in this time and gathering a lot of data about it.

On the other hand, during the Olympics event or World Cup we have sometimes witnessed that some athletes could not manage their temperament and they had fought against each other. As a result, it caused some tensions between countries as well. Therefore, many experts that athletes should make create an environment for realizing emotions do not work and it will be vice versa and negative effects to the supporters and the relationship among nations.

In conclusion, I firmly believe that the merits of this international event will be helpful for releasing patriotic emotions but I suppose that athletes should control their patriotic emotion.
