Some governments say how many children a family can have in their country. They may control the number of children someone has through taxes.
It is sometimes necessary and right for government to control the population in this way.
Do you agree or disagree?

Nowadays, the current issue around the world is about controlling population of the family. Sometimes states try to solve this problem by forc~~e~~ing and limitation~~s~~, but they can solve this problem in ~~with~~ better way~~s~~ without any th~~r~~eat.

In the past with war and widespread disease a large number of people died and it caused ~~regulated~~ population control but now a lot of these ~~this~~ factors have disappeared /have diminished/have been eliminated.

In my opinion, authority figures must try to inform people and encourage ~~encarage~~ individuals to promote their education with college and media to make them realize ~~understand them~~ that a small family can improve the quality of life. They can allocate them child-benefit ~~payment~~ for small families and limit taxes.

Some advocates state that the government must try to limit~~ed~~ their population to sustainable figure~~s~~ and without this the number of thi~~e~~ves and the rate of crimes increase to ~~because~~ cover~~ing~~ their family expenditure~~s~~ ~~of family~~, and as a result society will be less secure. ~~poverty increase in country.~~

To sum up, to enhance living standard~~s~~, leaders ~~one lider~~ must try to guide and control people and give them welfare for better life and the best one is the government. ~~,~~we can build our culture now to have a better lifestyle.
