

Some people think that it is better to educate boys and girls in separate schools. Others, however, believe that boys and girls benefit more from attending mixed schools.

~~Discuss both these views and give your own opinion.~~

Nowadays, schools play a pivotal role in children's future by equipping them to undertake an acceptable social role in society. To this end, authority figures should decide ~~that~~ whether ~~a the~~ segregated environment can create an effective situation or ~~a mixed~~ one. ~~learning that~~.

Some sociologists assert that separate schools in some individual countries cannot make more acceptable achievements than mixed ones ~~schools~~ and even arouse children's sexual curiosity more than a normal range which eventually can end ~~in to~~ physical and mental difficulties. Moreover, in these ~~/such~~ schools children can learn how to behave towards the opposite sex in order to turn into a better spouse in his/her family life ~~or~~ ~~and~~ an agreeable /cooperative ~~acceptable~~ co-worker in the workplace towards the opposite sex. Furthermore, mixed learning can engender a sense of competition ~~highly-competitive conditions~~ in children, leading to a more viable education.

On the other hand, some people maintain that mixed classes cause children to be distracted from subjects ~~which some of them~~ some of which require higher concentration like math and physics. In addition, they believe that a competitive atmosphere ensuing from mixed education cannot be avoid of demerits because it can bring some children with low academic abilities humiliation and comparison which can result in many mental ills and loss of confidence for a lot of the individuals. ~~the victims~~.

To sum up, as far as I am concerned, mixed sex methods of learning outweigh ~~overweigh those of the~~ segregation ~~those~~. Although it might have a slightly (a bit of a) negative impact, it can bring about an intellectual maturity in the future of our children and help them ~~in~~ enjoying a better life.
