

Countries are becoming more and more similar because people are able to buy the same products anywhere in the world.

Do you think this is a positive and negative development?

Over the recent decade, countries around the world ~~have are~~ becoming homogenous. Some say it could benefit ~~us~~, whilst opponents ~~point out have also~~ clear drawbacks. The essay deals with arguments for and against the matter.

In my opinion, there are clearly certain advantages to globalization. One of the important factors is that it makes parity of both facilities and opportunities for ~~a~~ variety of people ~~in the~~ whole ~~the~~ world. It means that with this process ~~as at~~ the same time people could achieve ~~the~~ same opportunities and chances, so their ~~making~~ choices increase more and more. Furthermore, it allows information to be shared between consumers and corporations. Another important ~~benefit is~~ promoting ~~economic~~ growth ~~economy~~ especially in ~~the~~ countries where commodities ~~are~~ provided ~~there~~.

However, this trend has drawbacks ~~too~~ (as well as privileges). One of the major problems with globalization ~~is that drifts apart~~ people and their local culture ~~drift apart~~. ~~Others~~ ~~Some~~ believe that the approach leads ~~to~~ ~~prone to~~ ~~proximity of nations~~ ~~close countries together~~, hence, unintentionally it erodes traditional values so that ~~an~~ alien culture replaces ~~the~~ local culture ~~gradually~~ steadily. Another potential disadvantage, ~~is destruction of~~ ~~destroying~~ small businesses in developing countries. Not only do they not ~~grow~~ ~~prompt their business~~ but also their trade ~~is~~ compared with ~~that of~~ developed countries ~~which~~ ~~whom~~ ~~exorbitant~~ investment ~~heavily in of the~~ same industries, hence, they will ~~be~~ eliminated. For instance, in many countries because of extremely import of clothes and shoes, a large number of local industries have to downsize or go bankrupt, so in this circumstance, factories ought to lay off almost more than half workers that ~~is~~ regrettably ~~unjustified~~. ~~it is no justification~~.

While it may be true to say ~~that~~ globalization ~~has been gaining momentum~~ ~~increasing common~~ in the last few years, I tend to say the drawbacks outweigh ~~the~~ advantages. In my view, governments can play ~~an~~ important role in management ~~of~~ this situation; it can help preserve ~~the~~ traditional and local culture and controlling ~~the~~ amount of import and export ~~goods~~.
