

Do you agree or disagree with the following statement? Reading is more enjoyable than watching movies.

As we march in this era /millennium we see a numerous kinds of new devices and technology. Notwithstanding, the innumerable advantages of these instruments are proliferate but it renders a lot of limitation in reading time.

Some advocates state that reading is more useful than watching TV. Not only does it improve your intellectual power of mind, but also it helps develop a new view of a better life. In fact, it makes a very such a profound change in the modern lifestyle.

On the other hand side, it helps individuals to boost their imagination and when they reading a book they can build their own virtual world and have enough freedom to imagine. It helps to develop escalating wisdom and prevents dementia suppression of brain to be old. Scientists state that reading a book causes people to be up-to-date and have a widespread information about our ancient, culture, religion, language and in some situations it gives you some must-be-written-to proof details of veritable events of past time for example you can know every details of world wars by reading the incident but in a movie you cannot access to these details this detail.

In my opinion, not only are books are accessible and but also are handy, but you cannot move television everywhere. Moreover, but you can read book at school, in the car, on the bus, car, bus, school, or train and always you can access to it as a reliable source.best origin.

To put it in a nutshell, books are more useful and a trustable reference to know about diverse cultures, religion, ethnicities ethnics and they are so informative and help the humans mind to be alive. It is an efficient document and it can be remain for this era and the next generation.
