

Nowadays crime movies, programmes and TV series are extremely popular. What do you think is the reason for this? What effects do these films have on our society? Give your own opinion and examples.

With passage of time, the popularity and accessibility of crime movies and programs have been increasing which can adversely affect society, especially the youth. The reason of desirability as well as the effects of such productions on the community are mentioned below.

In fact, the youth unconsciously enjoy the violent scenes in the movies, because not only do such films satisfy their hidden attitudes but also they experience a surge of adrenaline and energy, and it ~~cannot~~ ~~is not~~ be denied that teenagers always pursue the interests which lead to an adrenaline rush. These movies might illustrate crimes as a normal part of today's life that gives rise to normalizing the offence or even disobedience in the eyes of people. These productions result in promoting aggression among children in a way that when they see their beloved actors in a film, despite committing a crime or breaking a law, are not punished and conversely known as the heroes, consequently they are indirectly educated that every work or, even offence, is permissible to achieve the goal.

There are several courses of action open to everyone to mitigate the impacts of this issue, the most important of which is education. The authorities should raise public awareness such that parents are well aware of detrimental consequences of such programs. Media can play a crucial role in overcoming this challenge. Unfortunately media only serve to compound the problems. Constant barrage of violent productions direct people's mind only for the sake of attaining higher profit. Authorities should adopt some educational plans ~~plans~~ besides prohibitive ones for producers who only think about the ratings in order to find a remedy for this issue.

In sum, I consider such movies as pollutants for the subconscious /subconsciousness which is the source of a beautiful inner world that should be kept clean for our children, so immediately the government as well as parents should seek an effective remedy for this fundamental dilemma.
