

## Task:

Universities should accept equal numbers of male and female students in every subject.

To what extent do you agree or disagree.

These days one of the controversial issues in the educational system is female's ~~studding~~studying. Some socialists believe that the same number of male and female should be accepted in every field by universities while others maintain that some subjects are either appropriate for females or males. As an opponent, I will review some reasons in this regards.

A key issue about female and male is sex difference. As every ~~body~~ body knows there is **not** any similarity between men and women ~~neither~~ physically ~~nor~~ mentally, ~~so~~. ~~So~~ it is extremely important for females to choose a proper field in the university. A subject which creates ~~make~~ a great opportunity for their future. ~~For~~ ~~for~~ example, being in remote areas or harsh conditions is a first necessity for some occupations. This kind of job can create/cause ~~arise~~ some problems for females, for instance, women are more sociable and dependented on their family or friends, consequently, being away from this condition can depress them. Also, being in a severe state needs a special character which the majority of women don't have this capability.

Then, I believe universities should consider eligibility of applicants rather than their gender. I mean universities should think about the minimum requirement for each subject. For instance, everybody knows mathematics as a special studying field, so when universities receive a request for that, they should try to find out if they are ~~is he/she~~ eligible for that, ~~or not?~~ They can do it by reviewing their high school's scores or holding/administering ~~set~~ an exam. In other words, ~~words~~ we will have so many students who are disappointed with/at ~~form~~ their field if universities consider gender rather than competency.

Lastly I have to say that according to human rights, adequate and equal education is a basic right for women. But it doesn't mean we should have the same number of male and female students in universities. We have to find out where and how everybody can be helpful.
