

Task:

some experts believe that it is better for children to begin learning a foreign language at primary school rather than secondary school.

Do the advantages of this outweigh the disadvantages?

Nowadays there are many debates about when is the best time for pupils to begin learning a second language. While some specialists believe that primary school is the appropriate time, others think that ~~the~~ secondary school is better. I strongly side with the first group.

Based on psychologists' findings ~~founds~~ the best time for learning is between 5 to 7 years. During this period/span ~~In these ages~~ pupils have a brain with little ~~without any~~ distraction which is ready to receive ~~d~~ data. Consequently, they are capable of learning ~~to learned~~ and memorizing ~~ed~~ everything. For example when I compare ~~I~~ myself with my nephews who are at the ~~in~~ age of 8 to 10, they are really better both in ~~either to~~ remembering new words and ~~or~~ spelling.

Moreover, ~~as~~ everybody knows making mistakes is a decisive factor in ~~for~~ learning especially for learning a foreign language, and children are less shy compared to ~~rather than~~ adults to make mistakes, consequently the lower the ~~less~~ age, the more learning.

In addition, communication plays a pivotal role in ~~building to build~~ future society, and effective communication requires a common language. Thus, bilinguals played the main role in ~~to~~ building a new society. If we want to being able to speak two languages equally we need to learn them ~~it~~ like a mother language and it can be done if we start it in our formative years which ~~The formative years~~ for human learning, based on psychologists' findings ~~founds~~, is between 5-7 or in other words at the beginning of primary school.

As a conclusion, from ~~in~~ my point of view children can start the foreign language even before primary school, hence the benefits of learning second language at primary schools bring all the other drawbacks practically to almost zero.
