Many old buildings protected by law are part of a nation's history. Some people think they should be knocked down and replaced by news ones.

How important is it to maintain old buildings?

Should history stand in the way of progress?

Architecture is an inevitable part of all cultures. Throughout the ages, humans have illustrated their thought in their constructions, so demolishing them would be a hugely irreplaceable mistake. Observing the past could usefully contribute to technology in terms of morality and positive manners.

Historical buildings are often portrayed to be a major part of nations' identity. They could demonstrate our forefathers' lifestyles both money-wise and politically wise in that a noticeable amount of each government's s' budget has been spent in order to present their wealth and ideology. For instance, cities like Rome and Milan in Italy which where not only could help us reminisce about the Roman Empire's roman empire's golden era, they have brought national pride for all Italians. Moreover, these old but well-preserved buildings would be a brilliant opportunity for developing tourism which could absorb millions of visitors annually. What this approach would bring about is employment and consequently economic growth in a perfectly sustainable way; namely Colosseum and Pantheon.

What needs to be taken in tointo account is that history cannot be a detrimental factor for technological developments. Modern discoveries have enabled mankind to contribute their existence on the earth (?). The more informed this progress occurs with the assistance of our past generations' experience, the higher the chance of provision of a well-developed, peaceful world. What is more, new preserving materials and techniques would be highly beneficial in the maintained maintenance process of an archeological/historic/ancient building; such as palaces, mansions or churches. In addition, by delving into the past powers destinies, comprehending them and developing moralities among

societies; technological researches could ~~be~~ lead to being used in philanthropic activities rather than wars and violent behaviors that have caused thousands of innocents being killed each year during our contemporary era.

In brief, preserving the precious historical monuments should be a must for the sake of individuals and societies in all countries as a link to engage us with our past and true identity. Technology could be used to increase the efficiency of these places in order to be a constant reminder _of/_for grasping positive attitudes.
