Some people think that all university students should study whatever they like. Others believe that they should only be allowed to study subjects that will be useful in future, such as those related to science and technology.

Discuss both these view and give your own opinion.

The field of study which people choose at the university can strongly affect their future and even their life style. While many researchers believe that students must choose their major based on their own interest, considering future perspective before starting any studies is really/seriously/emphatically/especially recommended by others. I personally believe that choosing our study destination based on our talents, capabilities and maybe/perhaps our previous experience would play the role as a motivator for guiding us through the study path.

Despite the right of freedom in choosing the field Files of study, from the view point of many scholars' viewpoint, being able to match that with the future needs and issues in our country is really/extremely important. By having a look and trying to predict the future conditions, we will be able to have a more favorable/better situation in both job opportunities and even in our personal life. According to new findings more than 26 Percent of graduated university graduates students, even in must most developed countries, ought to migrate to other cities or countries for recruitment and higher/better income.

Whereas paying attention to our future context of our country is important, choosing a field of study which is fits to our personality, talents and other characteristics is really important. For instance, there are a lot of medicine students who quit their studies because they have blood phobia/otherwise known as hemophobia or many Introverts persons leave their researches unfinished on the psychological majors.

To put it in a nutshell, by letting students to choose their field of study, we will help them to find a suitable major which would suit/fit them and even we will help them to have more self-confidence but having a glance on the future could help them to mademake wisely decision.
