

There are more new towns being built nowadays. It is more important to include public parks and sports facilities than shopping centers for individuals to spend their free time. To what extent do you agree or disagree?

There are different views about the importance of constructing commercial or health public centers such as sport clubs for individuals to amuse themselves. In my opinion both of them play a crucial role in every body's life which should be considered in developing cities.

Some people believe that the existence of malls ~~are-is~~ just for amusing in leisure time and there is no need to be built in different places in the city, while I believe it is significantly important to have regional centers. Firstly, the majority of citizens tend to buy all their daily requirements from one place in a shorter time. Secondly, most of the time the individuals prefer to do shopping ~~by-in~~ their own cars and if they have to go more far to reach these centers, the traffic in the city will increase, consequently, the air pollution would become an issue in big cities.

On the other hand, the open areas and the sport clubs are ~~places~~ contributing ~~places~~ to keep~~ing~~ the people healthy ~~both either~~ physically ~~and or~~ mentally in different ages. The children need to play with their friends ~~/peers/playmates~~ in fresh air, so these environments should be located in their neighborhood where the parents do not need to spend a lot of time to reach. The older residents who generally have to walk alone to benefit from sunshine and simultaneously socialize with their friends might have difficulty ~~to~~ travel~~ing~~ by public transport; therefore, it is necessary to plan building the green spaces in every region. Finally, the young people ~~/youth~~ would rather ~~to~~ exercise in sport complex~~es~~ in ~~their~~ vicinity ~~of their homes~~, because ~~the~~ majority of them are students or employees and ~~they~~ do not have time and energy to spend in crowded streets after a busy and long day.

In conclusion, building a modern city with all kind~~s~~ of facilities to provide a high quality of life for the citizens is a critical issue which should be designed by experts to be constructed all over the city. In my opinion, keeping ~~/striking a the~~ balance between ~~construction of built-of-the~~ mall centers and ~~the~~ health clubs ~~are-is at in~~ the same level of importance and they would be effective ~~if they to~~ beca~~o~~me accessible in every region.
