

Some businesses now say that no one can smoke cigarettes in any of their office. Some governments have banned smoking in all public places. This is a good idea but it takes away some of our freedom. Do you agree or disagree? Give reasons for your answer.

People today have mixed views on whether it is correct or wrong. But in my opinion, I completely disagree with this statement since there is no correlation between smoking and freedom and also there are many reasons for which I hold this view.

Firstly, some organizations define a policy and apply it in their office and because of this some employers must obey the laws, otherwise many hazards can occur. For example these functions as a way of showing respect to other people who live near or spend their time beside them. By this I mean this action have many influence on may violate our rights.

Another reason is related goes to healthy. Giving smokers the freedom to smoke in public places or offices is too disastrous since some people are as passive smokers, by which I mean there are some vulnerable groups that we must pay attention to them more and more, like women, children, illnesses, and decrepits. Because it leads to various ailments such as asthma, heart disease and other issues like these.

Putting everything into consideration, not only should we expect defining policy from government or authorities, but we also should develop a condition in which smokers learn to pursue comply with the rules and believe that limitation on smoking does not ruin their freedom or constrains on their conviction, it just prevents them from severe consequences.

In psychological terms, perhaps people want to kill themselves but we can contain it by respecting to other people's rights. To put it simply, based on mounting evidence, there is marked contrast between freedom, limitation and smoking.
