

**Nowadays we are producing more and more rubbish.**

**Why do you think this is happening?**

**What can governments do to help reduce the amount of rubbish produced?**

**Give reasons for your answer and include any relevant examples from your own knowledge or experience.**

People are producing a large amount of waste these days. In my opinion, it is true that in the most ~~of~~ ~~countries~~ today every family produces rubbish every month or week. ~~These~~ ~~this~~ rubbish comes from things that we buy such as packaging or plastic things. I think ~~the~~ government should take some actions for this issue to decrease producing rubbish.

There are some reasons that we have much trash. The important reason is packaging that ~~it~~ comes from things ~~/items/goods~~ we buy from shops. For instance, when someone buys meat and vegetable or fruits, all of them have a separate packaging. Convenience is also very essential in the modern life, so people buy canned food or packaged. ~~B~~because they can ~~be~~ stored for a period of time when in the shop ~~and~~ then at home.

However, ~~the~~ a large amount of trash made is a result of whatever people use once and throw ~~it~~ away. ~~Even~~ The cheapest plastic bag can be used again ~~even~~. People need to be aware and learn about how ~~they~~ can use ~~these~~ ~~this~~ waste.

On the other hand, people should be ~~made~~ aware by ~~the~~ government. ~~in the general public~~. Young people can be educated about environmental issues at schools or university. Adults must take action. ~~The~~ Government can ~~promote~~ ~~persuade~~ such action by providing recycling services or by finding shops and families ~~so~~ that they ~~are~~ ~~encouraged~~ ~~do not attempt~~ to recycle their rubbish.

To conclude, ~~more~~ trash is ~~made/produced~~ ~~making more~~ now ~~such~~ that it is important to think about it. ~~The~~ Government has to prepare a great plan to increase people's awareness.
