

When a country develops its technology, the traditional skills and ways of life die out. It is pointless to try and keep them alive. To what extent do you agree or disagree with this opinion?

In the present time ~~the country~~countries need to be accustomed to technological advances because of their infrastructures, Backbones, mechanisms and interior policies. Hence, this transition should not influence/affect on traditional crafts and old aged skills. The governments should make thrive and support their conventional skills but in terms of keeping alive old traditions.

On the one hand, imagine old farming methods which ~~was were~~ wasting time, money and energy. In recent decades technology has equipped this field and modernized it to cultivate ~~their~~ lands with high quality and also yield become more productivity. Farmers now useing tractors and modern farming facilities and enjoy their new trend of working.life style.

On ~~anthe~~ other hand, even though ~~the~~ technology has developed sharply, some rural handmade Crafts are becoming popular using and having eager customers in modern urban life. Local residents need to real support to produce their local goods and technology can help them to achieve this indispensable Matter.

In conclusion, technology can preserve some old-fashioned ways of life, and this essential tool can be modified and shows us new alternatives toward a better world and human life.
