

**Many students have to live with roommates while going to school or university. What are some of the important qualities of a good roommate?**

In the present time, education is the major part of an individual's life. One should ~~be stay~~ away from family and hometown and also live in a hostel accommodation.

From my stand point, finding a decent/noble roommate with certain qualities is a crucial selection which and it changes your way of life. Because of this vital contribution you want to take ~~an~~ advantage of your time and energy.

First and the foremost, having highly intelligent and a broad-minded roommate keeps you hardworking, studious and change your attitude toward life. Your day becomes worthwhile and brilliant. This drastic collaboration starts at-on the first day of the semester. Gradually you change to a unique team in class, Assignments and projects.

In addition, relating associating with this cared-caring and not talkative person is necessary, for instance imagine at study time you need to focus on your university duties, even if your concentration is high-deep/strong/intense without his or her suitable assistance is unachievable.

Furthermore, attaching with attachment to such a benevolent and consultative fellow you can challenge-deal with every obstacle, for example you are confronted with sophisticated problems with his or her impressive solution eventually you ~~come up~~ overcome different issues that paradox. However, life has ups and downs and one should have this significant empathy.

In conclusion, in terms of having vitality and cheerful lifetime in academic years one should join with groups of wise people.
