**Do you agree or disagree with following statement?**

**Parents are the best teacher .use specific reasons and examples support your answer**

The important role of training and education of children is undeniable such that we can observe the effect of them in society directly. I believe that the parents have more efficiency in upbringing of children in comparison to school teachers. The Three most common reasons are the influence of children from parents, their close relationship and the length of time ~~it~~ they ~~passes~~ together in childhood.

One of the characteristics of the kids is that they want to do things that adults do. For instance, when a father or mother smokes cigarettes s in front of the children, ~~so~~ they learn how to smoke because ~~children~~ they are curious which ~~and it~~ confirms that parents can influence/affect/have a great effect on ~~penetrate~~ the children's behavior by their actions and reactions, . For this reason, . they play a role in their kids' subsequent ~~successes of kids subsequently~~.

It is my opinion that one of the most beautiful relationships in our life ~~are~~ is between mother/father and the child because they are basically shaped by pure love so parents s teach their children skills or anything else carefully and with all the ir focus .It should also be added that parents know the best manner to teach their children and have more flexibility in type of training.

Children ~~take~~ spend most of their time with parents until the age of seven and in this period, capacity of learning is incredible by ~~in~~ comparison to others. Speaking in ~~to~~ the mother's tongue is ~~a~~ clear ~~certain~~ evidence for proving this claim or another example is that the majority of famous composers s, started learning in their ~~when they were~~ childhood so parents should notice what they teach them because ~~children~~ they are ~~more~~ talented and absorb meanings more ~~easily~~ easier in these ages.

Parents' s Double Impact on Kids, lovely relationships and role of parents s in childhood are the factors that shows why they are the best teachers for children.
