

Some people think that all university students should study whatever they like. Others believe that they should only be allowed to study subjects that will be useful in future , such as those related to science and technology.

discuss both views and give your own opinion.

Without hesitation the university time and study play a crucial role in everyone's whole life. The courses students enrolling in, shape their characteristics and way of life. ~~In~~ this text we would like to will discuss the importance of usefulness and their interest in likelihood of their courses. I believe market-oriented study in university has more benefits.

The idea of studying whatever you like is supported by many people. It is like living a life with passion which is joyful, this joy can inspire students, which may results in more hard working and deeper understanding of what they study. This study time runs like a dream for them without little boredom. They may form a new boundary by their restless effort, Nevertheless, what is the usage?!

On the other sidehand, university time is like investment and passes very fast. with the commencement of after university time, real life starts ,people need a job to earn a living , usefulness and market-oriented courses are very important by then. For example I have seen many graduates d students who want to immigrate to another country because they couldn't find an appropriate job. Moreover, there are many educated people who suffer disappointment and psychological problems since they have difficulty finding do not have any job. They can't exchange pitch their degree for a decent and receive-goods-for living.

On the one hand, there are many benefits for students to follow their desires and there is no accounting for tastes! on the other hand, earn ing a suitable living is important in life. As a result, they had better/ it is better they choose their courses market-oriented and find their interest among them.
