

The relative importance of _____, which ~~was~~ is a frequent topic of debate, has now become more controversial. Although many people are claiming that it is advantageous, others reject this notion. The substantial influence of _____ has sparked controversy over the potential impact of this trend in recent years. In my opinion, the former/latter proposition appears to be rational. Not only will this essay elaborate both the positive and negative (adv/disadv – causes/effects) of _____, but also will reach a logical conclusion.

There are myriad reasons which will further explain this argument but the most preponderant one stems from the fact that _____. According to a startling new research conducted by Victoria University of Manchester for example, _____. Therefore, is it intellectual to disregard _____?

There are some pitfalls, however, that negate this argument which can certainly overwhelm the potential influence of _____. To simply put, if the most alarming issue is _____, it is rooted ~~to~~ in the fact that _____.

In addition, there are approaches to dealing with these concerns which are numerous while the most effective one might be (solution), which might seem impracticable at first glance, but comprehensive and feasible. Furthermore, as an illustration, research in this area invariably reveals that _____.

In conclusion to the argument outlined above, one can observe that the impact of _____ is indeed too great to ignore as far as _____ is concerned. The more you try for your goals, the better results you might achieve.
