

There ~~is~~has been an old relationship between humanss and animalss since a long time ago. these days petss are very ~~favorable~~popular among people. They are like family members and play important roles in every one's life who has a pet. Despite many differences ~~with~~with humanss, I strongly believe that they should be treated like family members. Below are some of my reasons to support my view.

I, personally, think that animals are like human beingss and they have affection and emotions like humanss. Although they cannot convey their message like humanss, theyy need whatever that we need to live. They need food, protection, medical service and proper shelter to live in. They live with us in a house and they should be treated like family members.

They can learn every~~thing~~thing and give us whatever we expected them. In many cases they protect family members from dangers. Usually they have special abilities to help people. A lot of experiments have been done by researchers that show animalss can help humanss in medical services. They are the best assistants for doctors to know health condition in some patients. For example recently they can help ~~to~~ diabetic patients just by smelling. They can understand the adrenalline status just by smelling.

They are so kind and loyal to their owners. In mechanized/mechanical societies a high percentage of people live alone. They prefer to have petss as their friends and spend time with them. In many cases children like to have petss and play with them. They can help ~~to~~ the elderly to doing routine tasks/affairs, so ~~so~~, pets are now ~~are~~ family members.

In conclusion, I think we are responsible for animals and they deserve proper food, clothes and good behavior. By treating them like family members and providing good life condition for them we will have an enjoyable companionship with them.
