

Some people say that in all levels of education, from primary school to universities, too much time spent on learning facts and not enough on learning practical skills. Agree or disagree?

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

You should write at least 250 words.

In the last decades, a massive change in education has been observed. However, it is argued that the most of educational systems relevant to the early age to the young ~~is-are~~ about real facts, while these skills are not considered ~~being-to be~~ practical. I strongly agree with this viewpoint because most of the training courses have been constituted by theoretical lessons and unfortunately ~~the-a~~ huge ~~number-~~~~amount~~ of social interaction has been observed.

One reason which can be mentioned is being theoretical sciences. Sadly, many of ~~the~~ teaching courses are not favorable ~~for-to~~ all of the students to attract their interest to learn. When it comes to the rest of them, ~~there~~ doesn't exist any adequate and enough well-equipped place or laboratory to do ~~experience~~~~experiments~~. Then, they have to memorize the lessons which become easily forgettable. On the other hand, the lesson which they have learned, will not have not far much efficiency and effectiveness in their lives.

In addition, the students will undergo serious problems after going out of the educational environments. Firstly, they are not educated how to have a desirable social behavior in society. Also, they will not understand how much the practical knowledge will be ~~benefited~~~~beneficial~~. For instance, it has ~~been~~ observed repeatedly that most of the high~~ly~~ graduated people are weak in interaction with people, ~~however~~~~although~~, they have high grades in their educational span.

To sum up, regarding the educational systems, not only do the existed facts need to be taught in the whole levels of any age, but also practical skills are necessary to be paid attention more. I definitely approve ~~of~~ this statement.
