

Every country has poor people and every country has different ways of dealing with the poor.

What are some the reasons for world poverty? What can we do to help the poor?

In contemporary days, there are a lot of ~~peers-people~~ suffering from poverty which is paradoxical with authorities' speeches who claim that there is relatively minuscule ~~precentage-percentage~~ of citizens who are living in slum houses. To be honest, some of these adverse conditions have been brought about by states.

There are enormous factors causing poverty ~~some of which that which some of them~~ are unknown. However, ~~scoisalist-socialist~~ experts' researches ~~had-have~~ cited many of these some of which I will mention ~~some of them~~ in the following paragraphs.

One of the major reasons for poverty might be lack of education. As it is vivid, employers mainly prefer to hire well-educated individuals who studied a major associated with the field of their career. Since having an occupation will be an essential economic aid, the employees could live in ~~sufficient-decent~~ property with a proper weelfare.

The next item for making people poor would be natural disasters. Earthquakes, volcanic eruptions, flood etc are some cases in point. When these incidents happen, this would make people lose their accommodation and assets. In these critical and insurmountable situations, it is most of the time a large quantity of the masses are not able to make up for/compensate this up and it would be impossible to renovate their property or buy or rent a new one.

To address poverty problems, promoting ~~in-the~~ educational system might be a solution. These days going to university or even college and schools is not affordable for many pupils. If this becomes free or less costly paid, a lot of students may grow educationally and actualize their potential ~~enhance in their latent jobs~~. Also I ~~has-been~~ advised ~~to~~ the governments to widen job opportunities for ~~numbers-those~~ who have not had adequate education degree or job experience who ~~are-have been~~ failed to be taken into account. These

strategies could help either poor communities and the government to overcome poverty.

All in all, poverty may be caused by numerous reasons ~~which~~ some of which have been the mentioned in this essay. Furthermore, factors like wars, sanctions etc could lead people to this catastrophic phenomenon. Although it is not straightforward for executives and peers, It can be solved with intensive efforts implemented ~~implimented~~ by authorities, and by the same token, done by people themselves.
