

Will modern technology, such as the internet ever replace the book or the written word as the main source of information?

Modern technology is facilitates/making communication easier and has an important effect on today's world. ~~is affecting so important in people's life.~~ People spend a lot of time on the internet. For example: they prefer to read books ~~in on~~ websites, but they do not look ~~ing~~ for buying books in different bookstores. Not only do people type ~~people~~ words in each program but they also copy and paste the main information. It is useful for people to save their time. The ~~pro-merit~~ of reading books ~~in on an~~ online website is that trees won't be cut down for producing papers in this case the environment will be protected. Hurting eyes is the ~~con-drawback~~ of reading books ~~in on~~ online websites when they are constantly ~~setting-sitting~~ in front of the computer.

On the other hand, modern technology helps police officers ~~can to~~ find more information about crimes detection, such as fingerprint. Today, it causes ~~thief-thieves~~ to be found easily and ~~a~~ strong security systems have been created that money and information are kept in banks and other organizations from being hacked around the world.

Modern technology is so quite useful for medical science. It causes certain types/kinds of cancer to be ~~have been diagnosed~~ recognized and most of them treated. Scientists can discover medicines s for preventing and treating diseases, as well.

Technology causes urges people in different countries to try to design and produce new cars and transportation, like hybrid cars ~~that they~~ that/which prevent air pollution.

In Conclusion, as mentioned modern technology has ~~a~~ pros and cons, so it depends on how it is used. ~~using people if everybody knows how to use it.~~
