

Nowadays people are influenced by fashion, in particular when choosing their clothes and hairstyle. Is this a positive or a negative development? Give reasons for your answer and include examples from your own experience.

Fashion as a popular style can be defined as a prevailing way people appear in public places. On the one hand, what we wear as our outfits such as clothes, footwear or the way we cut our hair and the make-up are typically physical examples of fashion. These days, people are used to following fashion in different aspects of their life, specifically in their clothes and haircuts. I personally, hold the idea that the merits of following fashion in society outweigh its drawbacks, and in this essay I elaborate on the advantages and disadvantages of following fashion.

The first, and perhaps the most significant reason that I think the impact of fashion on people's lives is positive is that fashion can create jobs. Tailors, models, hair dressers, photographers and individuals who are involved in transportation will definitely profit if people follow fashion. Admittedly, not only does fashion bring economic growth, but it also can change people's mood to a happier, and more competitive one. Although demanding a lot of investment, the fashion industry is now considered a profitable business.

In contrast, those who are not so happy with fashion believe that this industry is contaminating our water sources besides the damages to plants and livestock. Banned in many parts of the globe, animal skin, and other parts of animals are still considered a luxuriously fashionable commodity. The more we care about the fashion, the less we care about poor animals, and the environment. International brands of the clothing industry recruit underage workers in underdeveloped countries to reduce their cost, thereby gaining more profit.

By way of conclusion, I can say that I am totally agree with a business called fashion. Despite the fact that it can have irreparable damages to both humans and environment, I opine that officials can control these damages by introducing appropriate laws. Life without fashion is a black and white movie to a considerable number of people, myself included.
