

A large number of deaths are caused by road accidents. Why do so many road accidents occur? Make recommendations that would help to reduce the number of road accidents.

Causing huge numbers of casualties and losses millions of spirits every year, accidents score-rank as the first detrimental issue in many countries. There are numerous reasons for vehicle crashes such as poor quality of the roads and highways, unwise drivers and existence of inadequate automobiles.

Highways and roads are one of the most important ways of transporting goods and individuals, and numerous persons are using them every day, insufficient quality of these strategic infrastructures plays a pivotal role on-of safety and speed of transportation. By investing money in these buildings, the rate of accidents would definitely be reduced.

Careless drivers who do not obey the low-law or do not care about it, are the ones who should face the their-result/consequence of their actions, so they will not repeat their jeopardizing action. Of course unlike the minority who can only be addressed by lowlaw, the majority can be enlightened-throughout the education.

There is a third party-factor which is as important as the other two, which is the quality of cars which an individual person uses. The inspection service should get rid of the old and dangerous cars, besides that all the automobiles should undergo inspection be ran into an examination every year so their safety of them can be guaranteed.

To conclude, if there-the government wants to reduce the car accidents and casualties, they have to increase inspection in every section that can be spotted weak, and invest money wherever there is a need.
