

Nowadays technology is increasingly being used to monitor what people are saying and doing(for example, through cellphone tracking and security cameras). In many cases, the people being monitored are unaware that this is happening.

Do you think the advantages of this development outweigh the disadvantages?

Nowadays, many public areas have security cameras to control the criminals-, ~~while~~While in some cases it disrupts privacy. I believe that the benefits of these cameras ~~is~~ outweigh ~~of~~ theirs drawbacks.

Firstly, the government has to allocate some money to invest in the video camera systems and the payment for the staff to operate and maintain the systems. Secondly, video cameras makes people feel uncomfortable ~~to do in doing~~ their own activities in public places??

Nonetheless, the video cameras are considered key equipment that helps to reduce the rate of crimes. It has numerous advantages which are worth considering in terms of security. Surveillance security systems save your home and business places ~~for~~ against thieves. It would be very hard for robbers. This system offers a remote monitoring. We can keep an eye on our home and office .we can even check our staff movement by phone when we are out of office.

In conclusion, I personally believe that the benefits of using video surveillance outweigh its disadvantages because this is one of the best ways to ~~warm~~ warn the criminals in society and nothing can take its place.
