Task 2

Using a computer every day can have more negative than positive effects on young children do you agree or disagree?

These days with the increasing progress of technology every simple task would be done through computers. as a result, the huge amount of computer <u>using</u> by children <u>are</u> inevitable <u>so</u> in addition to positive there are negative <u>positive</u> for this matter.

<u>As a</u> point of view digital  products are better replacement for so many old fashioned matters we can follow our priority in tasks and do all of them in our busy schedule. <u>With</u> saving money, time and energy we can complete what we should have done and without any worries take care of our other tasks. Through these facilities children are able to organize their life, have chance for saving money for required moments and also access <u>to</u> all of data, news and other things as soon as possible. For example, attending online courses for a child who <u>don't</u> have physical disability will be a wonderful achievement <u>not only she can</u> raise her academic degree which has a direct effect on her status but also she can enjoy her time with her family and she is not putting her health <u>on</u> danger.

Considering all of positive facts everyone should be aware of negative side of digital <u>product</u> such as computers. Based on <u>scientist</u> research there <u>are</u> a great chance of addiction to computers and technologies which would make family members apart from each <u>other's</u>. Instead of spending time in free <u>moment</u> with family in bad cases children prefer to spend time with their digital friends in social <u>Medias</u>. In some cases, they can be dangerous persons who have bad intentions such as <u>bulling</u> or abusing kids.

According to <u>the mentioned ones above</u> I believe we should let our children use new technologies and <u>let them to progress</u> with the world and <u>beside</u> this inform them about the <u>treat</u> that could bother them and try our best to take care of them as much as we are <u>able</u>.
