

Do you agree or disagree with the following statement? The opinions of celebrities, such as famous entertainers and athletes, are more important to younger people than they are to older people. Use specific reasons and examples to support your answer.

Many people maintains that the speaking of popular persons have effective influence on younger individuals. But also they have a prejudice on their opinion more than older audiences. Younger peoples are less logical than older ones, They care to some bodies who they are not perfect in each side of life, and they can not make a precise decision.

First, young individuals are more emotional than old adults. Therefor, they have no idea when their popular person recommend some advices. They can't make a precise decision when they listened to the speaking of who, they love her. For example, researchers showed that most of the followers of soccer player and actors are teenagers. They consider to the comments and follow their followers. Consequently, they find out those speaking have influenced on these audiences.

Second, teenagers pay attention to superficial items and beliefs of famous people are extremely valuable for them because of they see positive

appearance of them. They appreciate the heroes who are just known by many society and there is no different for them that is their thinking useful too or not. When I was younger, a friends of mine loved a Rap's singer and she thought that he is a perfect human too. In elections, she voted whom he had told. However, later she understands that the singer received a lot of money for mention this recommendation and He advertised for the stupid candida.

Moreover, young persons are without much experience of judging subjects. They have less knowledge than older adults about critical thinking. They have read less stories, they have listened less news and etc. They can not have an exact judgment, so they use their heroes' suggestions. By the way, adults had opportunity to evaluate their decisions, and they can have a better judgment without much bias. In a country, people selected an excellent government and scientists show that the population of there was full of old persons, In other hand, it has much more old persons than young individuals.

In conclusion, the effect of famous people's ideas influences on the younger ones more than older persons. In my opinion, youngers should have chance

**to test their options and should being more clever listeners.**
