

Some people think the modern technology is making people more sociable , while others think it is making them less sociable . Discuss both view and give your opinion.

Modern technology plays remarkable part in everybody's lives. There are lots of new innovation that helps lifes easier .Nowadays we are more connect together . in my opinion, there are many pros and cons in the technology.

Advanced technology help to be in touch with the people that we loved.It helps us to meet our family member that lives far from us by a touch of a button and we are more aware of each other ,but it has negative effect that people dont like to meet each other in face.

On the other hand ,the people mostly youngs , spend many hours of their daily time on social networks and it gave a many opportunity from them to connect with real firends and family members . on another hand it help us to find people that we had a relation with them many years ago.

In conclusion, the technology have a good effect and bad effect both and it depends on the way that we explore it.
