

Some people think that e-books are the death of paper books while others think that paper books will never disappear. Discuss both sides and give your opinion.

In today's world, due to technology improvement, changing in any aspects of life is undeniable, including the substitution of modern books for traditional ones. Some people discuss this trend is going to continue until paper books complete disappearance, while the others believe the opposite. In this essay, I will discuss both sides and give my own point of view.

First of all, advanced technology is one of the highly influential items helping to achieve tremendous popularity of e-books. As an example, most of the people especially the youths prefer to have books on their hand-held electronic devices, which is more accessible, instead of having paper books. In addition, in terms of weight, e-books are easier to bear in comparison with paper books, which become excessive when their numbers increase. Furthermore, too much space is needed to lugging or even retaining them.

On the other hand, many a person holds the idea that paper books are feel-good ~~one~~ and ~~it's~~ its place will not be taken by e-books. Moreover, not only is a tome on a cellphone, even on a laptop, hard to read, but also it hurts human ~~'ss'~~ eyes. Besides, paper books, ~~even~~ are ~~though~~ hard to carry, are more valuable than e-books, especially the manuscripts ~~ones~~.

The main conclusion to be drawn from this discussion is that although reading e-books s has become more common lately, I believe that paper books ~~is~~ are more valuable than e-books and due to advocates of reading paper books, ~~it~~ they will not simply vanish.
