

**More and more are moving away from an agricultural background to relocate to cities in order to look for work.**

**What will be consequences of this? What solutions can you offer?**

With no doubt, the number of people who are moving to cities, ~~either~~ to find a job ~~even-or~~ to have better life, is increasing, which has negative impacts s not only for immigrants but also for a whole country ~~and~~. I will elaborate ~~after-effect some of its aftermath- of that~~ in this essay.

To start with, in many countries the quality of urban life, in terms of healthcare or job opportunity, is better in comparison with that in rural areas, leading to intense immigration to the metropolises. To exemplify, in my country, many a person ~~have-has came-come~~ to Tehran, the capital of Iran, and ~~have-had-has~~ been working there-here hoping to earn more money. Moreover, diminishing farmers and lack of agricultural products will be inevitable consequences s of continuing this trend.

On the other hand, the influx of immigrants s to the cities should ~~be control~~ controlled by the governments. Providing the range of facilities for rural areas such as educational ~~facility~~ facilities, healthcare and investing budget to build jobs for those who prefer to live outside of cities will be helpful to decrease the ~~number-rate~~ of immigration ~~at~~ to the cities. Besides, governments could exert their ~~authorities-authority~~ to motivate people to move outside of the cities, ~~as-As~~ an example, decreasing the tax rate for those who work in rural areas ~~otherwise rise tax in the cities~~ as much as it ~~is possible to~~ stops newcomers ~~to-from~~ flowing into the cities.

The main conclusion to be drawn from this discussion is that, ~~not only~~ ~~does-has moving-people~~ people migration to ~~the~~ cities ~~has-made~~ ~~make~~ metropolises overcrowded, but also ~~have-it has had~~ negative effects s on non-urban areas, ~~and one of which is~~ ~~lead-to-lack-of the~~ decrease in the number of farmers, hence ~~lack-of-food-for~~ food's shortage in the whole country.
