Some people ~~therefore~~ think that government should pay university fees for students who study subjects that are needed by society. Those who choose to study less relevant subjects should not receive government funding

Today, all societies need any type of jobs that can help people in order to ~~suppling~~ supply their requirements for a better life.
some specific jobs need to gain universal education for achievement certification and also there are typical jobs such as ~~chefs~~ cooking and sales ~~and salesmen~~ which ~~they~~ just need experience for the start. there ~~are~~ is an attitude that says ~~legal~~ the government should support and pay ~~universe~~ university cost of sensitive and important jobs in order to in prevent of ~~lace~~ lack of specialists.
Obviously, some intelligent students who can go on study at university in ~~there~~ their career because of ~~foundational~~ financial situations such as students in deprivation areas that ~~has~~ have talent ~~for~~ to preform difficult jobs. Furthermore, we constantly need employees for sensitive and ~~significant~~ significant jobs which government are worried of their decline in demand of studying them, such as, nurses and mine engineers.
on another hand, some believe that, a lot of ~~education~~ garduates intend to go out ~~into~~ abroad ~~board~~ after ending their study and help ~~to~~ them is useless ~~foe~~ for society, moreover they can gain huge salary after finishing study at university and that is enough for their motivation. They also propose ~~to~~ that the government spend that money in order to try for improve university.
All in all, we need to decide which one is so important for our society, training students with legal support ~~legal~~ for ~~competition~~ sensitive jobs or accepting the risk of lack of that. ~~In~~ from my point view it is obvious that damaging this risk in society is ~~more~~ bigger than the benefit of ~~save~~ saving money. And the government ~~hat~~ had better support creative students for helping ~~to~~ society ~~requiermets~~requiremets.
