

Creative artists should always be given the freedom to express their own ideas (in words, pictures, music or film) in whichever way they wish. There should be no government restricts on what they do. To what extent do you agree or disagree with this opinion?

~~In-since~~ ancient times ~~up-to-now~~, artists have constantly been limited and suppressed by autarchic governments or tyrannical kings, likewise extorted to work for them as doing whatever they desired to do. Sadly, nowadays, artificers face many of the same difficulties as their counterparts had which is an obstacle in their way of success. It is extremely important to mention that creativeness comes through a free mind. Without a doubt, if there is no preparation for that purpose, the universe will become empty from new ideas s and excitement.

To begin with, the most successful and creative writers, film writers, painters and musicians are those who can think freely and far from limitation and ~~implements~~ impediments of human laws beings' right. In this way, they can create a novel idea which has not been written and has not come to one's mind. In many cases, restrictions and limitations have had negative effect on people in every aspect of life and no one can deny it. No matter how small might be the restriction, the aftermaths will be irreparable. Human beings' civilization needs innovative opinions to progress their life which is shown during the technology age.

Although the presence of intelligent and bright individuals in the field of arts brings about progression of society, some priests or imams who are involved in religious concepts and also some authorities who are in charge of governmental responsibilities oppose ~~to~~ these kinds of alteration and cultural growth. For instance, when a director depicts some scenes of a political movie which has the critical and oppositional opposed against governments in every side, governments ~~apprehend~~ ban his/her movie and perhaps arrest them which are-is not fair enough for someone who just did say some facts about governments' behavior or attitudes.

To sum up all the statements above, I would believe that as long as artists are restricted, there is ~~not-an-atmosphere~~ little room for creating new phenomena and innovation at all. However, there is a saying that always during restrictions and demanding needs, a creative idea comes up on individuals' mind.
