

Every county has poor people and every county has different ways of dealing with the poor.

What are some of the reasons for world poverty? What can we do to help the poor?

Today, poverty is an ~~absolutely~~ main problem which most of the countries are dealing with ~~it~~. This essay will discuss some of the reasons for this poverty and what can be done to prevent it.

First of all, the government should have special attention to unemployment. The Lack of job ~~causes-~~ ~~renders~~ people ~~unable~~~~cannot~~ to obtain income which in turn increases corruption and poverty in society. However, some people can create a job for themselves and help others to have job through this method. Moreover, the government can give facilities to help the people and should have sufficient supervision on spending money. In other words, dividing wealth equally among the people has much of a role to play in solving income disparity.

Furthermore, the war has quite negative impacts on the economy of multitude nations. In war situations, not only are people struggling to survive but also living standards are dropping sharply, hence poverty spreads among the people. In this case, the government spends money on arms rather than focusing on people's livelihoods.

In addition, governments should manage their facilities such as human resources, mines and other advantages which they have. For instance, they can employ young people to increase their productivity and GDP. Also, they must prevent the people from selling the ~~raw~~ material to ~~the~~ other countries. For example, they can apply ~~raw~~ material to produce products which are ~~more~~ invaluable of value.

In conclusion, I believe that there are a large number of reasons for poverty. Unemployment, ~~the~~ war and the gap between the rich and poor are some clear examples for the mentioned issue which should be considered and solved by the government and people.
