Nowadays, many people spend the most part of their life at work. They passed ~~the~~ main part of their lifetime with colleagues and bosses. Hence, the most important aspects of one's job are satisfaction and feeling safety. This factor could directly ~~effect~~ affect on health.

Although, it is true that, there are a lot of factors ~~to~~ in job satisfaction such as: salary, position, ~~and~~ Job description, ~~—~~ All of the people should consider that they could not always be ~~satisfy~~ 100% satisfied with their job. I agree that ~~the realistic~~ realism ~~are~~ exists ~~to~~ in many people but in my idea people should consider their expectations according to the fact for feeling enjoy. On one hand, it is important to investigate one's satisfaction factors and the work environments ~~of work~~ have has to ~~be choose~~ chosen on this basis.

On the other hand, sometimes it is essential to create this satisfaction at work. For example, if the space of the workroom is not so delightful, there are a lot of ~~stuffs~~ ornaments to ~~decorating~~ decorate and make it more pleasant. I think if somebody, cannot feel comfortable at work, they must ~~seeking~~ the main reason and try to solve it. ~~Paraphrases~~ simply put, they ought to investigate the exact problem. ~~Weather~~ Whether it ~~refers~~ has to do with ~~to~~ personality or the wrong place to work. If it refers to personality, finding the clue is necessary and most ~~counselors~~ consoler can be beneficial. If the problem is choosing the wrong place to work in, it is possible the job has not been ~~choice~~ chosen based on qualification.

~~For~~ in conclusion, even though it is unlikely that everyone has a big chance to get a job and feel pleasant completely, I think it is unrealistic to expect full ~~that prompt more job~~ satisfaction and they ought to find more reasons to create enjoy at work.
