

Do you agree or disagree with the following statement ?

At universities and colleges , sports and social activities are just as important as classes and libraries and should receive equal financial support - use specific reasons and examples to support your answer.

Before i want to start this topic , I must say we have a-many different ~~numerous~~ students with different interests or activities .

From my perspective , sports and social activities are so important and valuable because they are related to the human body and ~~human-mind that~~ and they are the most important keys for to healthy living .

~~In~~ on the other hand , students have different priorities at university and not all students want to pursue a degree in law or medicine . Additionally , sports can make people ~~to be~~ more motivated and motivation is an essential factor ~~to in~~ getting successful. pluse, it helps us to have a happier society .

In contrast , some people believe that the ~~university~~ universities and colleges ~~is~~ are an institute where students come to education and learn academic studies . They say the main aim of university is education and research not sport so university and colleges should not receive equal financial support as classes and libraries

To sum up , ~~in~~ from my viewpoint students need lots of activities and motivation so ~~university~~ universities should receive equal budgets and financial support as classes and libraries and it is completely worth it because activities and young students are inseparable of each other .
