

Some people say that the Internet provides people with a lot of valuable information . Others think access to much information creates problems . which view do you agree with ? Use specific reasons and examples to support your answer .

It is obvious that anything can be beneficial or harmful and the Internet is not ~~excluding~~ excluded . It has both advantages and disadvantages but In my opinion it is more useful than problematic . I illustrate some explanations .

Firstly , by the internet we can access ~~to~~ knowledge very easily and quickly ~~in~~ everywhere . For instance , If you want to search for some subjects , you do not need to go to the library and waste a lot of time and read a lot of books . you can just search your topic ~~in~~ on the google or some websites and then you can find what you were ~~you~~ looking for .

Secondly , with the internet anyone can connect to any part of the world . For example , if you live in ~~the~~ Tokyo and your family resides in Iran , not only can you talk to them every day , but also you can speak to them ~~picture~~ visually with some applications such as Skype or Facebook even whatsapp and so on . And this is one of the reasons/things that has made migrations easier .

Another important point is that , the internet has revolutionized business . I mean creation of online shopping . You can order anything you want online such as clothes , foods , cars even plane or train tickets . This can help you to save your time and ~~do~~ not waste for this kind of stuff.

On the other hand , nowadays one of the biggest issues we are facing ; are is hackers and some information that which children should not have ~~not~~ access to it . ~~This~~ it is clear that social media like instagram where everyone can post or share information ~~on it~~ , because of this some ~~bad guys~~ offenders/wrongdoers or hackers will steal data and use it in adverse things or there are also some nasty images or films on the Internet that children ~~do~~ should not ~~have watch it~~ .

Ultimately , from my prespective it depends on the way you use the internet , it will brings benefits or cause problems which impact ~~to~~ your life but if you have the right settings or set a password on your computer , you can protect it from hackers or kids who are underage .
